Photo Semigloss Paper

For use with

EPSON Stylus® Pro 7000
 EPSON Stylus Pro 7500
 EPSON Stylus Pro 9000
 EPSON Stylus Pro 9500

Product Information

A favorite with photographers, graphic artists and print-for-pay providers, EPSON Photo Semigloss Paper is an instant-drying paper on a resin-coated (RC) base. This RC barrier allows the paper to maintain vivid, lifelike colors that rival traditional prints. Its non-cockling base make it ideal for photographs, promotional pieces, layouts, portfolio images, proofs, displays and posters. It creates high-quality prints by offering maximum ink coverage with brilliant color inks that dry in an instant. The paper can also be easily laminated to provide protection from light and moisture. Best of all, it works with both dye and Archival Ink systems. Like all of Epson's innovative media, this paper is engineered to give you the highest resolution and color saturation possible. Epson's printer driver software actually optimizes the amount of ink released onto the page, based on the type of paper used. As always, EPSON supplies guarantee EPSON quality.

Features/Benefits

- Highest color gamut available for vivid color reproduction
- RC paper base for photo-like prints
- Semigloss finish that reduces glare
- 1440 dpi printing for the highest quality output
- Dries instantly for easy handling with Epson inks
- Versatile and easy to laminate for most applications
- Compatible with both dye and Archival Inks

Feature Checklist

Feature	Performance	Additional Comments
Indoor/outdoor usage	Indoor use only	
Lightfastness	140 years (only when using EPSON Archival™ Inks) Six months (with dye-based inks)	Lightfastness ratings are based on accelerated testing of prints on specialty media, displayed indoors, under glass. Lightfastness only estimates the life of the ink, not the media
Gas-fastness	Excellent with EPSON Archival Inks; poor with dye-based inks	With regard to dye-based images, lamination greatly increases gas-fastness.
Archivability	Good	It is not recommended that unprotected prints be displayed for long periods of time, as the color of the coating may change due to atmospheric conditions.
Resistance to water	Good	Bleeding does not occur with incidental water contact. However, this paper is not recommended for use in wet conditions.
Ink drying time	Immediate (less than 30 seconds)	Ink is dry to the touch after printing. However, it takes 24 hours before it cures and becomes durable.
Lamination feasibility	Hot lamination or cold lamination	Top surface texture may cause uneven adhesion with the film.

NOTE: Actual print stability and longevity will vary according to image, display conditions, light intensity, humidity, atmospheric conditions, and post-printing treatments. Epson does not guarantee stability or longevity. For maximum print life, display all prints under glass or lamination or properly store them.

Professional Media Photo Semigloss Paper

Technical Specifications

Basis weight	170 g/m ²
Thickness	7 mil
ISO brightness	99%
Opacity	91%
Gloss at 60°	15
Hot lamination	Yes
Base material	Polyethylene Encapsulated Paper
Surface finish	Semigloss
Core size	2"
Spindle	2" standard

Driver Setting

Printer driver (EPSON Stylus Pro 7000/9000)	Photo Quality Ink Jet Paper
Printer driver (EPSON Stylus Pro 7500/9500)	Premium Semigloss Photo Paper
EFI RIP V1.5	Premium Glossy Photo Paper

Operating Specifications

Required temperature for optimum performance	60° - 80° F 15° - 25° C
Required humidity for optimum performance	40% - 60% RH

(Note: High humidity will prolong the drying time for lamination purposes.)
