**Product Information**

EPSON Presentation Matte Paper is the best media for producing photographic quality output, for users requiring a cost-effective matte paper. Applications include promotional pieces, layouts, courtroom graphics, proofs, indoor displays and posters. This paper is an economical alternative when high color photographic images are not needed. It is also easily laminated to further protect from light and moisture.

Unlike universal papers, designed to print on both thermal and Micro Piezo™ platforms, EPSON Presentation Matte Paper is specially engineered to optimize the ink chemistry which is specific to Micro Piezo technology. Therefore, the print quality of a universal paper used with an Epson printer is far below Epson's quality standards. In addition, Epson's printer driver software actually controls the amount of ink released onto EPSON Presentation Matte Paper. This results in the highest resolution and color saturation possible.

As always, EPSON supplies guarantee EPSON quality.
