PC MacLAN

Key Features

PC MACLAN™ offers convenient features for smooth and efficient file sharing between PCs and Macs. With both IP client and IP server support, PC MACLAN™ offers a fast, more efficient alternative to AppleTalk.

PC MACLAN™ also offers the first and only complete bi-directional printer sharing between PCs and Macs.

- **NEW Simple Setup** - User-friendly wizard interface makes the setup for sharing drives and printers quick and easy

- **NEW File Flexibility** - Enhanced support for longer file names, larger partitions, and files over 2 GB

- **Full Mac OS X Support** - Offers users of the latest Mac OS convenient, cross-platform file sharing

- **Complete Bi-directional Printer Sharing** - Covers all PostScript, non-PostScript, and inkjet printers

- **Network Compatibility** - Allows you to share any and all your network drives with your Macs
